Our History

PK COMPANIES

1997

The Beginning

Pro-Kleen (PK) was started by Kevin Turpin in 1997. The company began by applying high-end automotive & industrial machinery coatings, but with eagerness to learn new techniques that improve efficiency & quality, willingness to innovate and partner with coating and equipment manufacturers and continuous education, PK went from a small-town company to industry-leading company within a short period of time.

Begins To Pioneer Fireproofing & Specialty Services

After four years of painting heavy machinery and refinery equipment off-site with specialty applications, PK's reputation was growing. PK Industrial which was originally known as Pro-Kleen Inc. becomes incorporated. PK becomes the first company to spray Chartek 1709 in an onshore facility in North America. As fireproofing grew rapidly on new construction projects in 2005 - PK Industrial (PKI) became known as the world leader for intumescent fireproofing application in the oil & gas industry.

2004

2008

A New Division Is Born

With PK Industrial applying very complicated coating systems in dangerous and complex environments, they experienced the lack of training with the safety services provided. PK saw a need to innovate the process and improve the quality of safety reps and started supplying our own safety professionals. PK Safety was founded to provide safety professionals that meet the high standard and quality PK was known for.

Technology Was Going To Be The Answer

Throughout the growth of PK, we saw an opportunity to innovate and create consistency using mobile technology to sustain our growth. PK realized the value and power of mobility - access to information and data in real-time, so we hired a 3rd party company to build applications for internal use. However, they didn't understand the industry or have a passion for success, so PK decided to hire in-house development in order to apply our expertise. This was the beginning of PK Technology.

2011

2011-2012

The Growth Continues & intelliSPEC™

PK made the decision to invest in development to create a mobile technology that worked with a tablet. With a strong pool of developers trained locally in writing applications specifically for Apple at the time, PK developed its first product (intelliSPEC™) with internal solutions in FIRE & intelliSAFETY for use by PK Industrial and PK Safety. Product development allowed PK Companies to grow 100% each year and provide consistency. Services expanded into 22 states and the offshore market. During this period, customers took notice of the technology PK employees were using and started to inquire about external use. The development team continued to grow and PK was quickly becoming a technology company.

Innovation Is In Full Swing

PK decided to start an operations department within PK Technology to provide certified inspectors that were properly trained on the use of intelliSPEC™. After development, PK went to the market to merge inspection processes with mobile data collection - using our experience of running successful service companies to efficiently run an inspection company that can push inspection data into legacy systems.

2013

2019

A New Beginning & Development of weavix™

PK Solutions became the newest addition to our companies & now employs 30+ in-house developers and is working on the creation of a new product designed for workforce optimization (weavix™). weavix™ is a software designed to empower and optimize the desk-less worker through multimedia collaboration and workforce diagnostics.

PK Safety is a leading provider of integrated industrial safety services and strategies dedicated to keeping your workers and your facility safe.

We offer intelligent technological and service-based solutions designed to provide full transparency and comprehensive knowledge with experience you can trust, delivered by people who dedicate their lives to safety.

Overview

PK SAFETY SERVICES

On-Site Emergency

- Emergency Response Plan & Triage
- Fully Equipped Medical Trailers

Safety Training

- Your Training Partner for a Vast Array of Industrial Safety Topics
- Multiple Training Courses Available, Including Custom Courses to Best Fit Your Facility

Equipment

- Rental Equipment Available for Day-to-Day Projects
- Factory Authorized Calibration and Certification Services

Safety Attendants

- Hole watch, Fire watch & Bottle watch
- All Attendants Receive 24-36 Hrs of Custom In-House Training

Technical Rescue Teams

- Core Team has Over 100+ Hours of Training Annually
- Teams Consist of EMT, Military, Police & Fire

Field Safety Professionals

- Monitor Projects with Real-Time Communication
- Equipped with In-House Technology and DDMS

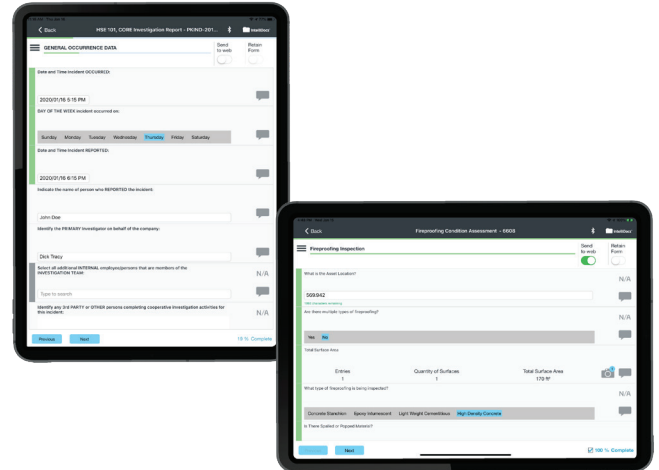

Technology PK SAFETY

Safety solution **intelliSAFETY™** helps clients ensure OSHA compliance and increase workforce safety by providing digital forms and real-time reporting of important safety related topics:

- Near Miss / Incident Investigations & JSA's
- Safety Equipment Maintenance & Tracking
- Safety & Field Vehicle Audits
- Fall Protection & Rescue Equipment Inspections

intelliSAFETY™

wilma™ is the confined space monitoring assistant that with the **weavix™** system is reinventing digital confined space management for the modern age of industry, at a fraction of the cost of other market solutions. Take advantage of:

- Non-Invasive, Portable Hardware with Patented Flexible Command Center
- Live & Continuous Video Feed of the Space & Manway
- Wi-Fi Network Extension into the Space
- Advanced Gas Monitoring of up to 8 Gases & Worker Fatigue Management

PK Technology provides uniquely efficient, API, NACE and other inspection services by utilizing in-house developed intelligent solutions designed to deliver complete transparency and comprehensive knowledge to assist owner clients with making better data-driven business decisions in near real-time, thereby helping assure asset integrity.

Overview

PK TECHNOLOGY SERVICES

Mechanical Integrity Inspection Services

- Flange & Blind Tracking
- Weld Tracking
- Vendor Surveillance
- Wall Charts
- Data Integration
- API 510 / 570 / 571 / 580
- CWI, API 577
- API 1169 Pipeline Inspections
- NDT-PT, UT & MT
- Data IDMS Clean-Up & Integration
- RBI Implementation
- Asset Validation (CMMS)

Fireproofing & Coating Inspection

Onshore & Offshore

- NACE (I, II, III)
- Coating Corrosion Surveys
- Repair Process Management
- Fabric Maintenance Program Management

Tank Inspection

- API 653, NACE, API TES
- Repair Recommendations
- MFL Inspection
- Seal Inspection / Repair
 - In-Service / Out-of-Service
- Vacuum Box Testing

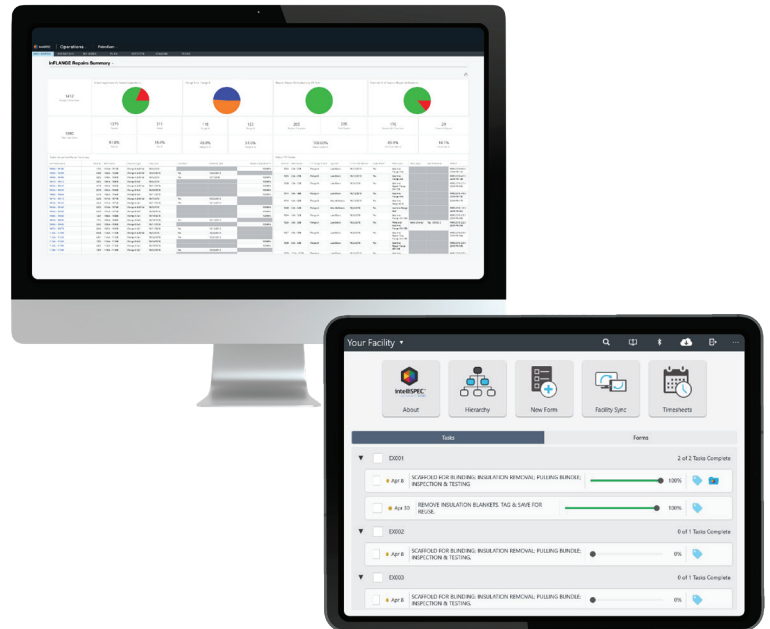

The Digital Field PK TECHNOLOGY

intelliSPEC™
ENTERPRISE DDMS

PK Technology elevates its services by utilizing proprietary software, **intelliSPEC™**. Designed specifically for the Oil & Gas industry, **intelliSPEC™** digitally captures data in the field and provides real-time reporting for complete transparency and comprehensive knowledge.

The only **single source inspection management** solution that provides an array of elements to achieve a company's integrity initiatives.

Benefits & Features **intelliSPEC™**

Digital Forms & Standardized Processes

- Standardization for Consistency
- Reduction of Human Error or Individual Interpretation
- Access to Reference Documents
- Efficient & Consistent

Field Visibility / Eyes in the Field

- Trackable Work Progress
- Real-Time Status of Completion

Digitized Data with Real-Time Data Analytics

- Accessible, Searchable & Transparent
- Automated KPI & Reporting
- Enables Ad Hoc Reporting & KPIs

Configurable Solutions

- Ability to Keep Existing Workflow
- Adaptable Processes

PK Industrial is a leading provider of passive fireproofing systems, industrial coatings & tank linings, scaffolding, and insulation with capabilities of providing turnkey shop & field production.

As a proven and trusted industrial services provider, we serve the following industries: oil, gas, petrochemical, aerospace, commercial, food & beverage, and manufacturing.

PK Industrial proudly services the needs of a facility or project, large or small - including mission critical projects.
