

PROFESSIONAL SAFETY ATTENDANTS

Hole Watch | Fire Watch | Bottle Watch

PK Safety provides the most professional and engaged safety monitoring technicians in the industry.

PK Safety provides the most professional and engaged safety monitoring technicians in the industry. Our safety attendants use our digital confined space management solution, wilma™, to enhance safety and provide transparency. With wilma™, attendants can view live videos of a confined space at any time from any device.

Our safety attendants are Gulf Coast and Midwest-based and go through over 24 hours of training prior to starting on the job site. Each attendant is graded after every project to make sure they are performing at PK Safety's high internal standards.

When not on assignment, our attendants provide general housekeeping, drinking water management, disinfecting services and equipment spotting. They are dispatched and managed by our Safety & Rescue Technicians.

PROFESSIONAL • MOTIVATED • HIGHLY-TRAINED • DRIVEN
