

PK SAFETY SERVICES

There is nothing more important to us than making sure all our clients' employees get home safe at the end of the day. The best technologies in safety are here, working hard to refine and deliver best practices that are innovative and the most cost-effective in the industry.

SAFETY ATTENDANTS BOTTLE, HOLE & FIREWATCH

PK Safety provides safety attendant services across all types of industries nationwide. Some of the industries include fertilizer, refining, oil & gas and mills.

GRADE "D" BREATHING AIR

PK Safety provides grade "D" breathing air for tank cleaning, confined space, blinding and any other task that requires respiratory equipment. PK Safety provides breathing air trailers, 12 packs and 2 bottle carts.

TECHNICAL RESCUE TEAMS HIGH ANGLE & CONFINED SPACE

PK Safety provides complete on-site rescue teams along with standby rescue teams for immediate deployment. Our rescue teams undergo highly specialized training that surpasses other industrial safety companies. You can depend on PK Safety's expertise.

FIELD SAFETY SERVICES

PK Safety offers clients safety professionals to help support day-to-day, outages, turnarounds and project work. Our safety professionals communicate with customers and their employees to ensure that all activities are executed safely and efficiently.

SAFETY EQUIPMENT REPAIR & SERVICE

PK Safety offers a wide range of safety equipment repairs and service with on-staff factory trained technicians. Our technicians are trained in gas detection, breathing air and fall protection repairs. We are an authorized repair center for MSA, Industrial Scientific and mPower gas detection.
