

WATER TOWER

MAINTENANCE & INSPECTION

Corrosion
Assessment &
Coating Survey

Key Services:

Corrosion Assessment & Coating Survey

Advanced corrosion and coating inspections using ultrasonic testing (UT).

Washout & Sterilization

Clean and sterilize elevated and ground storage tanks to maintain water quality.

ROV Inspection & Sediment Removal

Remote inspections and sediment removal without draining tanks.

Asset management & rehabilitation

UT scans of corroded areas for steel and concrete tanks, providing accurate data for engineering decisions. Certified rope access professionals handle inspections and repairs.

Maintenance & Repairs:

Coating Maintenance

We extend the life of previously installed coatings through pressure washing, hand-tool cleaning, and spot priming. This maintenance helps prevent premature coating failures and protects against corrosion.

Spot Repairs

Addressing issues identified during inspections, we offer repair and replacement services for vent hoods, ladders, overflow systems, level indicators, bug screens.
